

JB Green is now Type A Brown

We are making a change to our Type A battens. Previously known as JB Green, we have now switched to brown.

JB Green

Type A Brown

The new brown treatment uses MicroPro® micronized copper, which provides an enhanced fixation of the treatment, has a low VOC and gives a more natural appearance when used in external applications.

Marley Type A Brown Batten

- ▲ Made from slow-grown, kiln dried timber
- ▲ PEFC or FSC® certified
- ▲ Brown preservative treated to Usage Class 2
- ▲ Available in lengths 3.6m - 5.4m
- ▲ Not suitable for BS 5534 applications*

* For BS 5534 graded batten choose JB Red.
